

CGPA to Percentage Conversion Chart (0–10 Scale)

Printable reference chart based on common Indian university conversion formulas. Always confirm your official university grading rule before final transcript submission.

CGPA Full Form

CGPA stands for Cumulative Grade Point Average. It represents overall academic performance across semesters.

Common CGPA to Percentage Formulas

9.5 Multiplier Method: $\text{Percentage} = \text{CGPA} \times 9.5$

Direct $\times 10$ Method: $\text{Percentage} = \text{CGPA} \times 10$

AICTE Formula: $\text{Percentage} = (\text{CGPA} - 0.75) \times 10$

Universities may follow different rules. Always verify official regulations.
